

Safety Alert!

The Sentry Communication Systems (SCS 30/60) Will Help Make Your School A Safer Place—For Everyone

BUILDING BETTER SCHOOLS TODAY

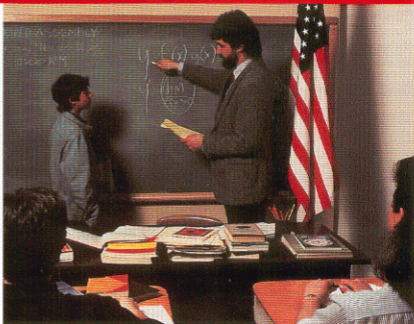

Today, the need for school safety has never been greater. That's why we pioneered the Sentry Communication Systems (SCS 30/60), a powerful, yet easy to use, safety system designed especially for school and institutional applications.

With the SCS 30/60 in attendance, your entire school — teachers, administrators, students and general personnel — will get the on-the-job safety and security they need. The SCS 30/60 immediately pinpoints where help is needed before a minor disturbance escalates into a major problem. This allows you to concentrate on the basics: reading, writing and arithmetic.

MAXIMUM SAFETY—UNPARALLELED FLEXIBILITY—THE UTMOST IN RELIABILITY

Unlike other systems, the SCS 30/60 is highly customizable — you configure the system to meet your school's precise requirements. Absolutely. Without loss of reliability or ease of use.

At the heart of the SCS 30/60 is the Master Processor and Annunciator (MPA) control panel. Featuring unparalleled flexibility, this addressable, multiplex component is easily managed by a two-button acknowledgment/reset action.

The system monitors 30 or 60 easily identifiable zones, with up to 20 sensors per zone. Both visual and audio announcement are available.

Because the SCS 30/60 is designed for institutions just like yours, it's highly adaptable. Easily programmable by one DIP switch, the SCS 30/60 features clean, positive tactile dome switching to make security monitoring easy. Plus, the SCS 30/60 is rack, flush or surface mountable to meet your school's security and space requirements.

The SCS 30/60 can stand alone or be integrated with a higher level system. It's your choice. Special options include data logging from a personal computer and integration with a higher-level system.

Compatible with all of Sentry's time-tested, ultrasonic transmitters and receivers, the SCS 30/60 clearly provides the highest, least intrusive, security possible today.

Sentry
PRODUCTS, INC.

Technology From A Time-Tested Safety Expert

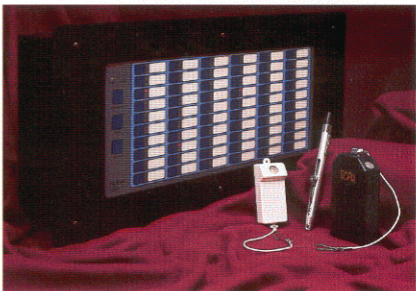

Sentry Products, Inc. is the leading manufacturer of silent communications alarms. An exclusive manufacturer of personal security systems, Sentry backs its products and components, including the SCS 30/60, with a two-year warranty.

SCS 30/60 SPECIFICATIONS:

- 30 or 60 zone annunciation
- 4,000-foot cable length
- Resettable individual zones
- Addressable multi-plex controller
- Up to 20 sensors (receivers) per zone
- Audible/visual alarm by zone
- Programmable using 1 DIP switch
- PC data logging capability
- Communication with high-level systems
- Rack, surface or flush mount
- Interchangeable control/remote
- Transient/short circuit protection

SCS 30/60 COMPONENTS:

- MPA-30 30-zone control/annunciator
- MPA-60 60-zone control/annunciator
- PS-103 Power supply
- MUX-100 Zone communicator
- MUX-200 Window-supervised zone communication
- BMX-100 Bridge between SCS systems
- ROC-01 Any alarm relay output board
- ROC-30 30-zone relay output board

RECEIVERS:

- RM Receiver/MUX combined (Audio available)
- RS Standard/dual/quad
- XS Dual frequency
- WS Weather resistant
- MS Medical/commercial
- HS Vandal resistant

TRANSMITTERS:

- P-105 Mechanical "pen"
- LC-110 Medical electronic
- LC-210 Basic electronic
- LC-210M Basic electronic with man down

SCHOOL SAFETY NOW!

For everyone's sake – why wait another day. Help your school earn high marks by installing a Sentry SCS 30/60 today! Together, we'll build a safe and healthy environment for teaching America's youth.
